1. The following documents (D) are referred to in this communication; the numbering will be adhered to in the rest of the procedure:

D1: DE 22 30 392 A1 (CASSELLA FARBWERKE MAINKUR A.-G.) 31 January 1974  
D2: EP-A1-0 293 744 (BASF A.-G., FED. REP. GER.) 7 December 1988  
D3: WO 03/002544 A (BRISTOL-MYERS SQUIBB COMPANY; PHARMACOEPIA, INC; AHMED, GULZAR; METZGE) 9 January 2003  
D4: US 2003/186984 A1 (ACKERMANN, JEAN ET AL) 2 October 2003  
D5: WO 2004/058174 A (BAYER PHARMACEUTICALS CORPORATION; CANTIN, LOUIS-DAVID; CHOI, SOONGYU;) 15 July 2004  
D6: EP-A-1 122 242 (YAMANOUCHI PHARMACEUTICAL CO. LTD) 8 August 2001

2. The present application relates to pyridine derivatives and their use as androgen modulators.
3. The amendments filed with letter dated 14.04.2005 are in accordance with the requirements of Art. 34(2)(b) PCT.

item V

4. Novelty (Art. 33(2) PCT)

The compounds disclosed in Documents D1-D4 are not considered falling within the scope of amended claim 1 due to the restriction of substituent R<sup>1</sup>. The requirements of Art. 33(2) PCT are thus fulfilled.

5. Inventive step (Art. 33(3) PCT)

Document D6 relates to compounds with anti-androgen action (see the abstract). The presently claimed compounds differ from compound 1-23 (table 7, p. 32 of D6) in an additional substituent R<sup>1</sup> and in that the N-atom does not form part of a cyclic structure. It would appear that the provision of compounds according to present claim 1 cannot be considered obvious for the skilled person when starting from the disclosure of D6 in order to solve the technical problem of providing further compounds useful as androgen

modulators. The claimed subject-matter which can thus be considered based on an inventive step as well. The application meets the requirements of Art. 33(3) PCT.

6. Industrial applicability (Art. 33(4) PCT)

Can be acknowledged for claims 1-14.

item **VI**

7. Document D5 was published after the priority date of the present application but before its international filing date. Its content would be considered as forming part of the state of the art if the priority of the present application was found to be invalid. When entering the regional european phase the document will also be considered for the question of novelty even if the presently claimed priority is valid. Examples 310-312 of D5 do not fall within the scope of amended claim 1 due to the amendment of the definition for R<sup>1</sup>.

item **VII**

8. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the cited documents is not mentioned in the description, nor are these documents identified therein.

item **VIII**

9. The expression "prodrug" does not have a precise meaning in the art and is thus not considered suitable to define subject-matter. Claim1 is thus not considered clear within the meaning of Art. 6 PCT.
10. Claims 9 and 10 are not acceptable under Art. 6 PCT. The therapeutic application is either not defined at all (claim 9) or functionally defined by a mechanism of action (claim 10) which does not allow any practical application in the form of a defined, real treatment of a pathological condition (disease).
